

SAFE, PORTABLE, & THOROUGH MIXING FOR IBC TOTES

Mix-a-Tote™ Agitation System

The Mix-A-Tote™ Agitation System from Agri-Inject allows growers, ag retailers and chemical wholesalers to safely and conveniently perform mixing processes in IBC storage containers. Agri-Inject develops products that merge quality, efficacy and safety at the highest level and Mix-A-Tote is a prime example.

KEY FEATURES

CONVENIENT CONTROL SWITCH

With the toggle-type control switch mounted in the electrical junction box of the motor, the ability to control the On/Off state of the motor is right at your fingertips and immediately available. No more rushing to unplug the cord to stop the mixer motor. This allows for a much safer system that protects the operator.

SAFE POWER CORD

The electrical input power cord is designed to extend over the edge of the tank but not all the way to the ground, ensuring that the cord end doesn't reach the ground and potentially sit in a puddle of liquid. Secondly, the cord is long enough that it can comfortably connect to an extension cord that can be secured to the tank's metal cage.

IBC LID

The Mix-a-Tote connects directly to an IBC Tote for easy sealing and mixing.

CORROSION RESISTANT

All of the wetted components, handle components and lid/bracketry components are either 300 series stainless steel or, in the case of the IBC lid, high quality glass filled polypropylene. As such, they are very rigid, corrosion resistant, and commercial grade.

← Single phase system shown

EASY TO HANDLE & USE

The handle hardware has been designed to be easy to lift, carry and install into the IBC container. The handles are 7/8" and feel comfortable in nearly any hand size. The control switch is mounted in an easy to use location with a gripping rubber cover to ensure non-slip engagement.

EFFECTIVE IMPELLERS

The impellers have been designed to provide thorough agitation. The direction of mixing is configured for "up-pumping" agitation, eliminating vortexing and creating an "enveloping effect" within the tank, providing excellent and rigorous mixing.

MODEL COMPARISON & SPECIFICATIONS

	Single Phase	Three Phase
PART NUMBER	896-11-113411-0	896-34-113411-0
WEIGHT	34 lbs	37 lbs
OVERALL LENGTH <i>includes motor</i>	47"	47"
HANDLE WIDTH <i>max width</i>	17"	17"
SHAFT LENGTH	35"	35"
IMPELLERS <i>two each shaft</i>	4" MaxFlow Style	4" MaxFlow Style
MOTOR - FULL LOAD AMPS	8	0.9
CORD LENGTH	21"	70"
SWITCH	Single Phase, SPST	3-Contact Manual Motor Protector
PLUG	Standard Single-Phase 15-Amp, Grounded	Not Included, User Installed
IBC LID MATERIAL	Glass-Filled Polypropylene	Glass-Filled Polypropylene
ALL WETTED METAL PARTS & HANDLE	300 Series Stainless Steel	300 Series Stainless Steel

WHY AGRI-INJECT?

Agri-Inject's Mix-a-Tote tool sets the standard for mixing convenience and safety in the agricultural industry. The company's deep understanding of the challenges faced by farmers and agricultural professionals has driven the development of systems like Mix-a-Tote, providing a level of convenience never before seen in the industry. The company has spent countless hours testing and refining its processes, resulting in a mixing experience that is second to none. The Mix-a-Tote's user-friendly design, combined with its cutting-edge features and safety features, make it the go-to choice for anyone looking for the best mixing experience in IBC storage containers.

✓ WE ARE THE INDUSTRY PIONEER

Not just an industry leader, but an industry pioneer. Agri-Inject is responsible for shaping the way growers treat their crops. Our inventions have changed the face of agriculture, and continue to help farmers around the world precisely, efficiently treat their fields.

✓ RELIABLE, WELL-BUILT EQUIPMENT

All of Agri-Inject's American-made equipment is made for durability, convenience and safety, providing end-users with dependable, accurate service for years and years.

✓ WORLD-CLASS SERVICES & SUPPORT

World-class service and support with our in-house service and repair team, online product manuals, videos, and a dedicated customer support team.
