

# PRO Formula GREEN™ QUIK-DRI WITH FLAMEOUT

THE FIRST PREMIUM ABSORBENT THAT  
REDUCES THE RISK OF FLAMMABILITY

## WHY QUIK-DRI™ WITH FLAMEOUT?

Quik-Dri with FlameOut, a revolutionary line of non-toxic, all-natural, ultra absorbents, is engineered to quickly and totally eliminate all liquid spills\*.

## HOW DOES IT WORK?

Quik-Dri with FlameOut absorbent products use a ceramic-based formula, designed to lock in liquids, leaving behind a surface completely free of residue; capable of absorbing up to 7 times its own weight in liquid.

## WHERE CAN I USE IT?

The Quik-Dri with FlameOut line safely eliminates any type of liquid spill, from hazardous to harmless: acidic, flammable, combustible, infectious, aqueous, alkaline, odorous and more.

## CAN I USE IT ON A FLAMMABLE SPILL?

Yes. Quik-Dri with FlameOut reduces the combustibility of a liquid spill by interfering with each of the three sources of the fire tetrahedron: heat, fuel and oxygen. Quik-Dri with FlameOut provides a cooling effect that prevents the heat requirements of the fire. It also encapsulates hydrocarbon based fuels, forming protective micelles that reduce the risk of ignition. Plus, it interferes with oxygen sources by scavenging free radicals during an ignition event.

## HOW WILL THE QUIK-DRI WITH FLAMEOUT LINE OF ABSORBENTS SAVE MONEY?

Quik-Dri with FlameOut Absorbent reduces operational costs because it requires significantly less product than any other absorbent on the market. Less product means less waste, less storage and less disposable space required than other absorbents.

## Uses Less. Absorbs More.

Spills in the workplace come at a high price. Not only do companies lose the cost of goods spilled, substantial disposal costs are incurred by spill response absorbents. Using Formula Green Quik-Dri with FlameOut versus a typical clay absorbent saves business owners up to 70% in disposal costs because of its superior absorbent capabilities.

# THE SAFEST WAY TO CLEAN UP YOUR TOUGHEST SPILLS

## PROBLEM / SOLUTIONS:

### Worker's Safety

The most effective way to reduce the risk of slips and falls in the workplace. According to OSHA, slipping and falling in the workplace remains one of the most common cases for serious injury to workers<sup>1</sup>. **Keeping a clean, dry floor in the workplace is a priority for all business owners.**

### Health Considerations

The most popular selling spill absorbents on the market are made with materials listed by the World Health Organization as an IARC Group 1 carcinogen; the same category as asbestos. **Formula Green Quik-Dri with FlameOut is crystalline silica-free and is 100% non-toxic to the environment and its users.**

### Universal Spill Absorber

Spills in the workplace are not limited to just oils, grease and water based spills, so why keep absorbents on hand that only clean up non-aggressive liquids? **Formula Green Quik-Dri with FlameOut absorbs all liquids\* spilled in the workplace.**

**These test results compare absorbency of the Quik-Dri with FlameOut Absorbent to a 40lb bag of clay on 1 gallon of 30-weight oil poured on concrete:**

	QUIK-DRI WITH FLAME-OUT	OIL-DRI
Volume of Fluid Absorbed	1 Gallon	1 Gallon
Spill Diameter	4 Feet	4 Feet
Amount of Product Used	2.5 Pounds	35 Pounds
Shovel Loads Needed to Lift Absorbed Waste to Container	2	12
Clean-Up Time	4 Minutes, 20 Seconds	15 Minutes
Total Pounds for Disposal	9.75 Pounds	42.5 Pounds
Residual	CLEAN	SIGNIFICANT
Flammable	NO	YES

\*Except hydrofluoric acid.
