

Stainless Steel Ball Bearing Frame

The Custom Windsock Company manufactures heavy duty, stainless steel ball bearing frames for use in all industrial applications. Our frames are completely made of 304 stainless steel, including all hardware (nuts and washers), making them completely corrosion resistant. Dual ball bearings are enclosed in a fully waterproof and lubricated chamber for long lasting rotation in any environment.

The frame can be taken apart and flat-packed for easy shipping. The heavy duty double ball bearing assembly is fully enclosed for protection from the elements and the stub is fitted with 3/4 NPT threading for easy connection onto any NPT coupling or pole.

Item Number	Material	Weight	Package Size	HS Code
SSBB10	Stainless Steel	4.5 lbs	12"x12"x4"	9015800090
SSBB13		5.5 lbs	14"x14"x4"	
SSBB18		6.5 lbs	19"x19"x4"	
SSBB24		7.5 lbs	25"x25"x4"	
SSBB28		8.0 lbs	28"x28"x4"	
SSBB36		9.5 lbs	37"x37"x4"
