

**Stainless steel steam, compressed air and gas filter housing.**

Donaldson's P-EG filter housings are designed for purification of compressed air, technical gases and steam in the chemical, electronic, and food and beverage industries.

P-EG filter housings offer:

- Versatile 304 stainless steel design with NPT or ANSI flange connections in various sizes to fit most air, gas and steam applications
- A broad selection of elements for culinary steam, compressed air coalescence and sterile air filtration
- MTRs available upon request
- Gas capacity up to 12,700 scfm at 100 psig
- Steam capacity up to 17,100 lbs/hr at 50 psig
- Design specifications that are customizable upon request
