

New Product: Fluid Defender

Don't Take Risks With Your Bulk Fluids

Graco is excited to announce the new Fluid Defender® product line, designed to give you control of bulk fluid tanks to prevent overfill and pump runaway.

[Learn More](#)

Fluid Defender

Control and monitor up to 5 tanks and utilize air solenoids to increase control and defend from overfill or pump runaway.

Pulse® Fluid Defender

Receive valuable tank data into the Pulse Pro software to further improve tracking and management of bulk fluids. Set email alerts to increase visibility to alarms during off-business hours.

Take a deeper look into the other parts of the Fluid Defender product line.

Air Control Solenoid

When installed in line with air supply and pump, the solenoid will prevent air going to the pump when an alarm is triggered.

Float

Monitor high level, low level or both high and low level on a single channel. This float is able to monitor tall tanks up to 30 ft.

Remote Light

Optional lights that allow visibility into a triggered alarm remotely. These lights are typically installed at waste oil stations or a manager's office.
