

Vent Limiter Assembly

Product Summary

The NMT® Vent Limiter Assembly is composed of four components: the NMT® Vent Limiter, a vent elbow, the NMT® Vent Limiter Cap, and a cotter pin. The Vent Limiter Assembly enables a gas regulator to be positioned in various orientations while enabling the Vent Limiter to stay in its **REQUIRED** vertical orientation for proper vent limitation. The Vent Limiter Cap is added to prevent debris from blocking the vent ports, and is required for all outdoor gas regulator installs.

Features

- Flexible orientation.
- Vent port protection.
- Outdoor compatibility.
- Simple assembly and installation.

Specifications

Regulator types N5 and NGR Series gas regulators.

Maximum Inlet Pressure 10 psi.

Materials

- Vent elbow Eco-brass.
- Vent limiter Eco-brass.
- Vent limiter Cap UV-stabalized polymer.
- Cotter pin Zinc-plated spring steel.

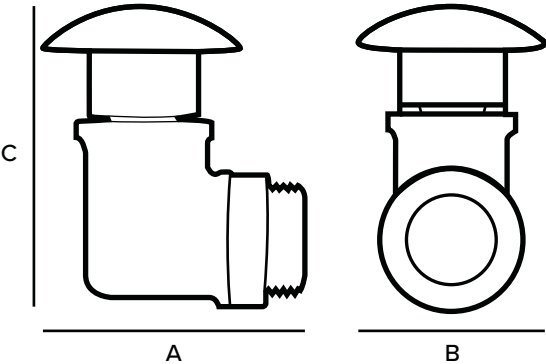

The Vent Limiter **MUST** be vertical to properly perform.

How the Vent Limiter Assembly can appear on an NGR regulator.
