

# HANDHELD INFLATORS ANALOG

## AIRLITE ECO

PCL's linear tyre inflators display a pressure reading on a horizontal scale, with the indicator position determined by the contraction of a carefully calibrated and sensitive spring delivered by the pressure in a tire or other vessel. The life and accuracy of the gauge is dependent upon the spring's accuracy, as well as the valve mechanism, with PCL's market-leading AIRFORCE® MK4 being the number one in the world. PCL's range now also includes the economy Airlite Eco Tire Inflator.

The airlite eco was designed for less demanding environments or occasional use, making it cost-effective and a great addition to a general trade or enthusiast tool kit.

PCL's linear inflators offer fast inflation and deflation rates. With large, clear viewing windows, two-stage valve designs to ensure accuracy, and longer life compared to competitors', this range of gauges is what you need for your shop or garage to suit your tire inflation needs.

### SPECIFICATIONS

Display Type:	Linear
Reading Accuracy:	2 psi
Max. Supply Pressure:	188 psi
Hose Length:	16 inches
Inflation Range:	0-140 psi
Tire Valve Connection:	Twin Hold-On/Euro Clip-On

### KEY BENEFITS

Inflate/deflate tire pressure while engaged on tire valve system
Made from nylon filled polymer for a warm, robust feel
Textured thumb lever allows greater control and comfort
Lightweight design - Easy to use with reduced fatigue
Easy-to-read clear window and linear gauge readout
1-year warranty

### PART # DESCRIPTION

LAG1H03	16" HOSE, TWIN HOLD-ON CHUCK
LAG1H08	16" HOSE, EURO CLIP-ON CHUCK
