

Portable Oil Drain
Model # 3723
Model # 3733

Mobile waste oil drains are used for gravity collection of motor oil and gear oil, as well as other automotive, nonaggressive A-III class fluids. Models are fitted with a telescopic bowl and they can be used under vehicle lifts or inside lubrication pits for collection of the used fluid.

Drains include a 5 gallon capacity, height adjustable collection bowl for wider reach. All models are equipped with a level gauge. Deluxe drain includes bowl expander and drain top tool tray

Once full, the reservoir is emptied by being gravity drained into underground tank or using the optional remote pump through hydraulic type connector fitted to the bottom of the unit.

Model # 3723
27 Gal. Deluxe Oil Drain

Model # 3733
18 Gal. Oil Drain
