

DSR SHOP ESSENTIALS

DSR122

- 275A Engine Start 12V
- 125A Engine Start 6V
- 65A Flash
- 20A<->60A Boost
- 15A Fast Charge
- 4A Maintain

DSR124

- 330A Engine Start 12V
- 300A Engine Start 6V
- 250A Engine Start 24V
- 70A / 100A Flash
- 30A<->80A Boost 12V
- 15A Fast Charge
- 4A Maintain

- These models start charging the same as older manual wheel charger technology on batteries with voltage as low as ZERO volts.
- These units have heavy duty internal transformers, but new high tech circuitry that controls the entire charging process.
- Designed for use on all battery types: Standard, AGM, Gel, Deep-Cycle and Start Stop batteries.

Enhanced features include:

- 0 Volt start up
- Top mounted, easy to use control panel
- Easy to read digital interface
- Touch pad controls
- Telescopic handles
- Units ship fully assembled
- Industrial, angled clamps
- Thick 4 gauge HD copper cables
- Front mounted cables allow for better reach
- heavy gauge steel
- Durable, rugged wheel ideal for any condition
- Flash Reprogram Mode—constant power supply
- OBD memory saver adapter included
