

Cubetainer™

The competition can't stack up to Snyder!

Stackable Tanks, Stands and Containments

Providing Bulk Storage Solutions for Motor Oil, Lubricants, Hydraulic Fluids, ATF, Antifreeze & DEF

Sii **SNYDER**
INDUSTRIES, INC.

Snyder Industries is a recognized world leader in the design and manufacturing of highly engineered durable rotationally molded tanks used in a wide variety of industries for over 50 years!

Snyder's new Cubetainer product line offers cost effective fluid storage solutions for Auto Service Shops, Quick Lube Stores, Fleet Operations and a variety of other industries.

Eliminate Hassles of 55 Gallon Drums

- Messy clutter from drum storage
- Unused product in each "empty" drum
- Potential contamination from outdoor drum storage
- Down-time moving 55 gallon drums
- Potential injury and workers comp claims from moving awkward drums

Buy in Bulk: Reduce Your Total Fluid Expenses

A one-time, cost-effective investment will store multiple Class IIIB fluids such as motor oils, lubricants, hydraulic fluids, ATF, Antifreeze, DEF and many other fluids. A refillable bulk storage system also reduces waste from packaged goods.

Optimize Valuable Shop Space

Our space saving stackable fluid systems can open up valuable floor space to allow for additional revenue producing shop work space or the expansion of the number of service bays.

Flexibility to Move Fluids Throughout Your Shop or Forklift Tanks into Trucks

Convert a stationary system into a portable storage system for point-of-use dispensing with either caster wheels or the addition of a forklift/pallet jack pallet base.

Secondary Containment

Provides a clean and safe barrier between the tank and the environment for EPA and SPCC Compliance. Primary tanks combined with secondary containment provide a clean, space saving solution to meet SPCC guidelines and 40 CFR 264.175 requiring 110% capacity of a single primary tank within the containment.

Uniform Stacking Combinations for level shelving. Tanks can be stacked in a variety of size combinations to accommodate different volume requirements within the exact same space.

Dependable, Versatile and Durable Space-Saving Stackable Storage & Dispensing Systems

- Constructed from Virgin High Density FDA compliant Polyethylene Resin
- Standard Footprint with all sizes making them stackable in any combination – No conversion brackets needed which add cost!
- Convenient center fill
- Translucent tank and molded in level markers allow for visual level inspection without the need for external site gauges.

Part No. Brass Inserts	Gallon Capacity	Dimensions
1032000N95401	60	36" x 36" x 17 1/2"
1032100N95401	80	36" x 36" x 21 3/4"
1032200N95401	120	36" x 36" x 30 1/2"
1032300N95401	180	36" x 36" x 39 3/4"
1032400N95401	260	36" x 36" x 57 1/4"

Options / Accessories

Snyder Offers Many Solutions in Fluid Handling

Stationary tanks - 8 to 16,500 gal.

BULK STORAGE & PROCESSING TANKS

For larger stationary applications, Snyder offers the industry's broadest range of tanks – from 8 to 16,500 gallons – in shapes that meet your specific needs. To match your special function requirements, we also market a complete line of accessories, such as stands, seismic tie-downs, ladders, fittings, gaskets, sight gauges, heat tracing and insulation.

Double Wall tanks - 35 to 12,500 gal.

DOUBLE WALL CONTAINMENT TANK SYSTEMS

For outdoor applications or when larger capacity is needed Snyder offers double wall tank-in-a-tank containment systems in one space-saving unit ranging in size from 35 to 12,500 gallons. The double-wall construction is completely enclosed so that external matter such as rainwater, snow or debris is prevented from collecting in the outer containment.

Transportation containers - 60 to 550 gal.

UN/DOT-APPROVED IBCs - STEEL, PLASTIC, COMPOSITE

Snyder intermediate bulk containers (IBCs) are durable, corrosion-resistant and economical. These long-term, reusable containers are ideal for the transportation of both hazardous and non-hazardous liquid materials, including containers for viscous materials, like greases.

USED OIL COLLECTION TANK SYSTEMS

Unique tank-in-a-tank space saving containment system provides 120% containment of tank capacity to comply with EPA standards for waste oil storage containers CFR 40-279.22. Tanks are maintenance free and won't rust, chip or dent and are weather resistant for outdoor use. Lockable lid design provides outdoor security.

DRUM CONTAINMENT & SPILL PALLET PRODUCTS

Our line of spill containment products include spill catchment modules for catching spills and drips. Drum containment systems for one, two or four drums. Drum Funnel systems and poly bumpers.

All products are molded of chemical resistant polyethylene and feature a reinforced design and one piece seamless construction for long lasting, heavy use.

ONE SOURCE DOES IT ALL

Whether you are a manufacturer or distributor, Snyder Industries can help you improve the function, economics and performance of your company's bulk handling systems.
