## YOU ASKED. WE LISTENED.

**We've expanded our offering to meet more of the industry's evolving needs.**

### Different by design!

**You asked** for a different type of cleaner. **SmartShot** starts at the molecular level and is packed with oil-loving micelles that strip and absorb oil-based grime. Water-based, non-hazardous and biodegradable — it's the ideal cleaner to add to your daily cleaning processes.

See **SmartShot** on page 62

### Clear signage!

**You asked** us for signs that are clearly visible and easy to install. **Spill Kit Floor Signs** and **Spill Kit Station Signs** are the solution you need. They both show you where your spill kits are located without blocking accessibility to the tools you need.

See **Spill Kit Accessories** on page 84

### Stormwater solutions!

**You asked** for products to help protect our waterways. Our **Filtration products** prevent oils, sediment and debris from entering your storm drains. They'll help you keep runoff pollutants in check and maintain compliance with Stormwater Regulations.

See our **Stormwater range** on pages 86-89

## Selecting the right SpillTech Mat for your needs

**Determine the TYPE of liquids being absorbed:**

 **Universal –**  
For oil- or water-based liquids (oils, coolants, solvents and water)

 **Oil Only –**  
For oils and oil-based liquids, not water (oil, diesel, gas, petroleum and fuels)

 **HazMat –**  
For chemicals and unknown liquids (acids, bases)

**Determine the AMOUNT of liquid being absorbed:**

 **LightWeight –**  
Small spill or slow drip

 **MediumWeight –**  
Consistent leak or drip, medium spill

 **HeavyWeight –**  
Flowing leak or drip, large spill

**Consider the APPLICATION:**

- **Small leaks or drips:**  
Choose a 1- or 2- ply absorbent
- **Larger spills, wiping or the presence of foot traffic:**  
Choose a more durable 3-ply absorbent
- **Abrasive tasks:**  
Choose an absorbent with a spunbond top layer to reduce linting or tearing
- **Mat construction**  
Check out the TechSpec on each mat presentation for details about mat construction

# Budget Friendly Basics.

Part of making smart spill decisions is not buying more absorbent than you need. Not every job requires long-term durability or heavy-duty strength. Sometimes you need an absorbent that will let you get in, do the job, and get out. These absorbents are versatile enough to use for just about any challenge that pops up on your job site.

## Smart Selection Tip:

### Look for the Contractor Grade Symbol and save.

SpillTech's economical line of absorbents also come in Oil-Only Pads and Rolls (page 24-25) and Booms (page 39).

# Economy You Can Count On.

If your priority is economy and short-term use for oil spills, Contractor Grade absorbents are a good choice. These oil-only pads, rolls and booms are versatile enough for most outdoor uses.

## Smart Selection Tip:

### Look for the Contractor Grade Symbol and save.

If budget is your top priority, we've made it easy for you to spot our economical line of absorbents. Look for the Contractor Grade symbol at right! See our Contractor Grade Universal Pads and Rolls on pages 6-7.

Contractor Grade mats are perforated, unlike other entry-level mats. Rip off only what you need to waste less and save money.

**Ideal for outdoor use — Responder Mat provides quick, efficient cleanup to help protect the environment from contamination.**

### Smart Selection Tip:

## Perf-free for better performance on water!

Choosing a mat with perforations can be advantageous for some applications. If you'd like flexibility in choosing your mat size, for example, perforations allow you to take what you need and save money.

For water applications, however, perforations can be a disadvantage. Whether it's on a stream, retention pond or open water, deploying mats to soak up an oily spill on water is just the first step. You also need to retrieve them once they're saturated and heavy.

SpillTech's Responder Mats are not scored or perfed, so after doing their job, they hold together while being hauled back ashore for easier, quicker cleanup.

# BUILD A CUSTOM SPILL KIT WITH JUST WHAT YOU NEED!

Get the perfect Spill Kit for your application.

If you can't find exactly what you need in our selection of pre-packed kits, we'll be glad to build one to your specifications. Answer five simple questions (at right) to help choose the type and quantity of sorbents you require, the accessories to make the response safer and the container that will work best. There's no extra charge for this service, so it's an easy way to customize your spill response plan and stock only the sorbents and PPE you really need. After you've made your list, just contact your local Distributor and we'll do the rest!

## 1. How much do you need to absorb?

What is your worst-case scenario? You'll need enough sorbents to clean up the maximum amount, whether it's one gallon or one hundred.

## 2. What liquid are you absorbing?

For multiple everyday liquids, use Universal. To soak up oil and repel water, choose Oil-Only. To alert workers to a dangerous spill, use HazMat.

## 3. What type of spills do you deal with?

Slops and spills use pads for quick wiping and cleanup. Drum/tank leaks need more socks for diking and Plug & Dike epoxy to stop the flow. Large-volume spills require booms for containment and pillows for more sorbency.

## 4. What type of PPE and accessories will you need?

Most spills call for boots, gloves and goggles. Will you need coveralls? How much chemical protection do you need? How often will you have to replace disposable items?

## 5. What type of container will you need?

For removing saturated sorbents, use a UN-rated Overpack/Salvage Drum. Stationary Kits can go in a flat-bottom Overpack. Movable kits require a kaddie or wheeled overpack.

### Smart Selection Tip:

## Overpacks vs. Salvage Drums

### What's the difference?

An **OverPack** is an outer packaging that holds and protects one or more intact, undamaged smaller containers of hazardous materials. A **Salvage Drum** is a metal or plastic open-head drum, tested to DOT requirements, used to transport damaged, defective, leaking or non-conforming hazardous materials packages, or hazardous materials that have spilled or leaked.

## Specialty - Textured 36oz RPE

Textured floor is designed with safety in mind, especially on wet, oily or soapy environments.

- Surface texture increases traction underfoot by providing more grip between boots and the berm floor, helping to reduce the risk of slips and falls
- Soft foam sidewalls allow you to roll in equipment or vehicles; low profile 4" walls compress under equipment then bounce back
