

There when you need us most

EZ-PULL QUICK DISCONNECT

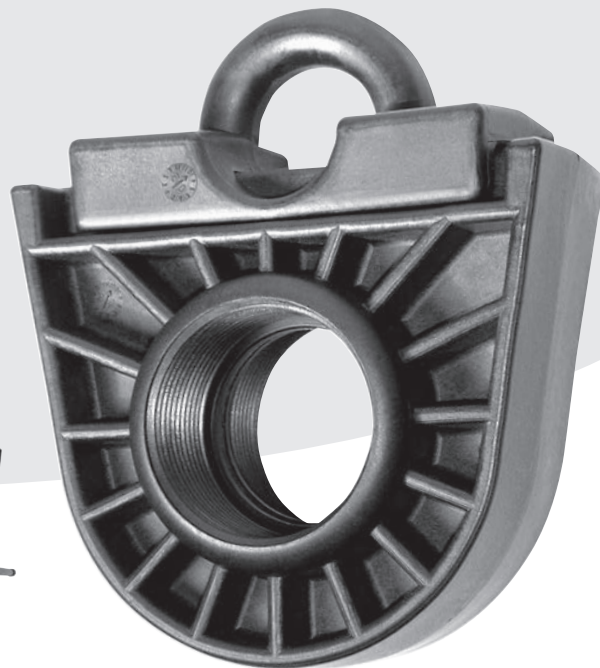

EZ-Pull

Imagine never having to squeeze into a riser, or stick your head into a septic tank, just to work on the pump.

With the patented EZ-Pull Quick Disconnect, you can quickly and easily pull or install a pump, in any type of tank, safely above ground.

Features and Benefits

- The combination of a two-piece tapered connection, along with a compressed o-ring, provides you with a watertight seal.
- Made from glass filled thermoplastic, so you won't have to worry about strength or corrosion.
- Available with 1.25", 1.5" or 2" FPT connections.
- Making life even simpler, the optional **EZ-Puller** allows you to effortlessly remove the EZ-Pull, no matter how deep down it is.

Optional EZ-Puller
