

DEF CUBE 132 US GALLONS

The DEF Cube is a transportable, environmentally-secure, double-walled diesel exhaust fluid storage tank, that offers extended run time on stage IV/V diesel generators and other non-road mobile machinery. Ideal for both hot and cold climates, the DEF Cube is the ideal solution for the temporary power industry's auxiliary DEF dispensing and replenishment needs.

FEATURES

LOCKABLE EQUIPMENT CABINET

Secure lockable compartment for pumps & accessories.

STACKABLE DESIGN

Stackable full (2 high) or empty (3 high).

RENTAL READY

Robust 'rental ready' design with outer containment tank.

REMOVABLE INNER TANK

Removable inner polyethylene tank (ideal for storing DEF).

HEATER KIT

Optional heater kit to keep DEF from freezing in cold climate applications. 16' feed hose to link to generator or other equipment (option for heated hose with add-on heater kit).

FOUR WAY FORKLIFT POCKETS

Forklift pockets and lifting lugs for ease of transport.

IDEAL USES AND APPLICATIONS

GENERATORS AND AUXILIARY EQUIPMENT

The DEF Cube can be easily connected to multiple generators to supply DEF in the same way auxiliary diesel tanks are connected to a generator unit. An optional 115V AC heater kit includes a heating jacket and heated hose line which is powered by the generator to prevent the DEF from freezing in cold climate operations.

SHORT TERM DEF REQUIREMENT

The DEF Cube is the ideal solution for short term, onsite DEF storage. Due to its mobile design, the DEF Cube can transport DEF to any site, reaching even the most difficult locations.

MODELS AND CAPABILITIES

SPECIFICATIONS	DEF CUBE
Capacity	132 US gal
Dimensions (L x W x H)	44 x 44 x 45 in
Weight (Empty / Full)	723 / 1,825 lbs
Optional pump	115V AC pump for ad-hoc filling of other equipment
Optional heater kit for tank with generator feed	Heating jacket for inner tank 2,300W Heated feed hose 400W Heating controller module with thermostat 115V AC power cable 20' length
