

2" DRY-SHUT SYSTEM

AUTO SHUT-OFF POLYPROPYLENE COUPLING
REDUCE SPILLAGE AND WASTE

INTRODUCING DRY-SHUT FROM CPP

The Dry-Shut from CPP is a precision moulded minimum spill coupling for low pressure liquid transfer. On disconnection the poppets automatically close and shut off the liquid flow, resulting in minimal residual loss or air inclusion. This simple ISO "A" type operation makes it easy to handle with no levers or switches to operate. Our Dry-Shut couplings are ISO 7241-1 series A (ISO-A) interchangeable.

TECH SPEC

Max working pressure: 60 psi (4bar) with spikes upto 100 psi (7bar)

Flow rate: Up to 540 L/min (143 USG/pm)

COMPATIBLE: ISO 7241-1 (ISO-A)

	PART NUMBER	PRODUCT DESCRIPTION	
1	DS20BMVF20BV027	2" Dry-Shut male valved adapter X 2" BSP female GPP. C/W Viton seals	
2	DS20BFVF20BV027	2" Dry-Shut female valved coupler X 2" BSP female G/P/P. C/W Viton seals

TECH SPEC

At **CPP®** we have developed a range of easy fit converters, adaptors and fittings to complement our **DRY-SHUT** coupling system. They are precision moulded in our factory in the UK, all come with seals for a leak free connection.

Body Material: Polypropylene

O-rings & Gaskets: Olefin elastomer
